INTRODUCTION

Introduction & Purpose

The USA Historical AFV Register is intended to provide a cataloging of all of the historical Armored Fighting Vehicles (AFV), including tanks, APCs and self-propelled artillery, etc that are on preserved or otherwise displayed in museums or as monuments in the United States. As such the registry ranges from the World War I-era Skeleton Tank to modern M1 Abrams tanks. However, the registry is not intended to include modern AFVs that are still in service.

Format

The USA Historical AFV Register is organized by state and city or town as follows.

STATE

CITY OR TOWN

Location (GPS Coordinates)

AFV Model	Man/User	status	Notes and/or location
-----------	----------	--------	-----------------------

Man./User denotes the original manufacturer (country) and various users, using three letter country codes.

Status is denoted by one of the following codes.

ind = indoor display

out = outdoor display

std = stored (this can be either indoor or outdoor storage, but clearly not on display)

wre = wreck (typically vehicles recovered from a target range or simply in very bad condition)

Often, if there are a large number of AFVs on display in a particular town or military post, sublistings are also provided, organized by location - museum, building, road, etc.

Many of the vehicles listed as "Unconfirmed" are from the "Central Registry" of donated vehicles maintained by the U.S. Army's Tank-automotive and Armaments Command (TACOM). Many of these vehicles donated to American Legion and VFW Posts may actually be located in local parks. Additionally, many of the "Unconfirmed" World War II era vehicles - such as Sherman and Stuart tanks - have since been moved or may no longer exist.

Additional information about a particular vehicle is often included in footnotes.

Serial Numbers (SN) and Registration Numbers, aka "USA" numbers (RN) are given when available. Note that many M60 tanks have two SNs, the original one as built and an Anniston Army Depot (AAD) rebuild SN (which ends in an A) or a Mainz Army Depot (MAD) SN (which ends in an M). For British and Canadian WWII era vehicles, War Department (WD) Numbers are given when known, as are post-war Vehicle Registration Numbers (VRN) for British vehicles.

Sources

The USA Historical AFV Register is compiled from a number of sources. Firstly, the register is an expansion of Leslie Delsing's [Wrecks and Relics in the USA](#) tank registry, posted to the [AFV News Discussion Board](#) on 22 May 2006. The register has also been greatly expanded thanks to armyjunk2 and his copy of the TACOM Central Registry. Some of the other notable online sources include the [Waymarking Military Ground Equipment Displays](#) site, the former [Tanks for the Memories](#) geocaching site, [The Sherman Register](#), [Toadman's Tank Pictures](#), Trevor Larkum's [Preserved Tanks](#), Robert Buettner's [War Memorials of Wisconsin](#), and Don Moriarty's [The History of the Ontos](#) as well as forums and message groups such as the [AFV News Discussion Board](#), [G104](#) (the Sherman Register mailing list), [G103](#) (dedicated to Stuart tanks), and [G136](#) (dedicated to M8 Greyhound and M20 armored cars). Where possible, the origin of information on a particular vehicle is denoted in footnotes. A large number of individual contributors, many of which are credited throughout the registry, have provided invaluable information.

Note on Serial Numbers

All Serial Numbers, Shop Numbers, Registration Numbers, War Department Numbers, Vehicle Registration Numbers, etc come from the public domain or directly from the owner with permission. Public domain includes publicly visible areas of the vehicle (commonly stamped or marked on the exterior) when on display, data plates if visible/open to display, or other public domain forums and sources (such as reference works, the AFV News Discussion Board, G104, Sherman Register, etc).

⁵⁷⁶ The former Patton Museum of Cavalry and Armor closed in September 2010, with the majority of its armored vehicle collection now in storage at Fort Benning and Fort Knox. "As an outcome to the Base Re-alignment and Closure (BRAC) committee study, the Armor School [moved] from Fort Knox to Fort Benning, Georgia. Since the vehicles in the Patton Museum collection are part of the curriculum of the Armor School, the bulk of the museum's vehicles [are] moving to the new U.S. Army Armor Museum when it is completed in the 2011-2012 timeframe," according to the Armor for the Ages Patton Museum Volunteer website. Vehicles started moving to Fort Benning in February 2010. The museum re-opened as the "General George Patton Museum" in April 2011. ⁵⁹⁴ Would be RN 40226809. One of two T28 pilots built in 1945. Believed to be the first pilot, which was located at Aberdeen Proving Ground until at least 1946, then at Fort Belvoir by at least 1951. The T28 was "lost" for about 20 years (believed to have been scrapped) until it was found at the Combat Developments Research Lab range at Fort Belvoir and recovered by the Patton Museum in 1975. The other, second T28 pilot is believed to have been destroyed by fire during testing at Yuma, Arizona c1946. For more information see "T-28 Exists," *AFV News* (Preston, ON: The AFV Association), Vol. 10, No. 6 (November 1975), 4-5.

⁵⁹⁵ Much of the information on former Patton Museum vehicles, including SNs and RNs, comes from the [Armor for the Ages: Patton Museum Vehicle List](#), [Patton Museum Vehicles](#) and Don Moriarty (2/2007). Many Fort Knox M60 SNs from Joe D (AFV News Discussion Board, 5/2006) and Joe DeMarco (G104, 6/2006). The current location and status of several vehicles previously identified as part of the Patton Museum collection and/or on display at Fort Knox is unknown. These include an M4A3E8 Sherman Easy Eight (SN 65997, formerly at Abrams Center); an M74 (SN 73362); and an M551 Sheridan (RN 13F158, Formerly at Harris Hall).

⁵⁹⁶ Has RN 3083084. This tank is the original "Cobra King," which served with C Company, 37th Tank Battalion - the first tank to enter Bastogne during the Battle of the Bulge in December 1944 (for further info see Dave Melancon, '[Cobra King led 4th Armored Division column that relieved Bastogne during Battle of the Bulge](#)', U.S. Army Europe Public Affairs Office, 25 February 2009). Following the relief of Bastogne the tank may also have supported Task Force Baum during the Hammelburg Raid in March 1945, according to Joe DeMarco (G104, 12/2005). The tank was re-armed with an M1A1 76mm gun on the orders of Lieutenant General George S. Patton, commander of the 3rd U.S. Army, in March 1945. After World War II the tank was put on display at Kitzingen / Wirzburg, Germany, then McKee Barracks in Crailsheim, Germany in the mid/late 1950s, and finally moved to 37th Armor Regiment Park and the Rose Barracks Gate in Vilseck, Germany in 1994 (Kitzingen / Wirzburg location information identified by Joe DeMarco, G104, 1/2009). After it's significance was official confirmed, "Cobra King" was shipped from Vilseck to Fort Knox in June/July 2009 for restoration, according to Mary Markos, [Historic Cobra King heads to new home in Patton Museum](#), U.S. Army Garrison Grafenwoehr, 16 June 2009. The restoration includes removing the 76mm gun and re-arming it with an original M3 75mm gun (taken from M4A3E2 Sherman Jumbo SN 50429) as it had during the Battle of the Bulge. The tank is planned to go on display at the at the National Museum of the U.S. Army when it opens outside of Washington, DC in 2013. The tank was first identified as the original Cobra King by Keith Goode and Joe DeMarco (G104, 5/2001), and by Sergeant Brian Stigall and Steven Ruhnke who were able to convince Army leadership of the tank's identity and significance. The tank's identity was officially confirmed by the U.S. Army in 2008 (Jennifer H. Svan, [Vilseck tank confirmed as 'Cobra King.'](#) *Stars and Stripes* (European edition), 27 December 2008).

⁵⁹⁷ An MBT-70 modified by Col Jimmie Pigg with M60 and M88 parts to serve as an XM803 surrogate. The tank's [plaque](#) describes the chassis as an "automotive test rig, torsion bar version, of the 803."

⁵⁹⁸ Formerly located in the [LST Building](#).

⁶⁰² Likely chassis no. 6, RN 9B1051 - the second pilot T95E3, later converted to a T95E8 and then fitted with a variable height suspension and M60E2 turret. Based on information from David R. Haugh and Michael Duplessis, "An Idea Too Early for Its Time: The US Army T95 Medium/Heavy Tank Series," *Journal of Military Ordnance*, November 1999. Formerly located in the [LST Building](#).

⁶⁸⁸ Used by the French army and carried the name "[Niederbronn II](#)" (probably in honor of a WWII Sherman of the same name). The tank was later used as a monument at Daley Barracks in Bad Kissingen by the [14th Armored Cavalry Regiment](#) and [1st Squadron, 11th Armored Cavalry Regiment](#) and then at Rhein Main AFB. The tank arrived at APG c1/2006. SN from Joe DeMarco (G104, 3/2006). For more information on the tank's history in Germany see [Eaglehorse.org: Find That Tank](#).

⁶⁸⁹ The turret was a gift of the British Purchasing Commission in 1944/1945 (along with a sister sent to Canada) and originally mounted on an M4A3 Sherman for test by the AGF Board and the Ordnance Department, according to Mark Hayward, *Sherman Firefly* (Essex, England: Barbarossa Books, 2001), p 145, 153 and David Fletcher, *Military Ordnance Special No. 19 Sherman VC M4A4 Firefly* (Darlington, Md.: Darlington Productions, 1997). If so, the placement of the turret on this M4A2 appears to have been done post-war. The Sherman hull is SN 1405, RN 3065484, the first M4A2 hull built by American Locomotive, according to Joe DeMarco (G104, 4/2004 and 7/2006). Currently painted in Canadian colors with the name "Sherbrooke." See also Baumgardner, [Photobucket: MCV336 M4A2 Sherman Firefly](#).

⁶⁹⁴ "Captured by the Germans and used until lost in the North African campaign, then shipped to the U.S. via reverse lend-lease scrap shipments in 1943 and diverted for the Ordnance Museum from Brooklyn, N.Y.," according to the Ordnance Museum Guide CD, as well as *Tank Data*, 5. See also Baumgardner, [Photobucket: FMCV229 Mk IIA](#).

⁶⁹⁵ The Ordnance Museum claims that this Mk IV was originally the British tank "Britannia," which saw service during the Battle of Arras in 1917, was sent to the United States in 1918 to sell war bonds and then renamed "Liberty." However, the museum's tank does not appear to be the original Britannia, as it lacks a cab roof hatch. For more information on the Ordnance Museum's claims and preparations for restoration of the tank see [The Measurement and Modeling of a World War I Mark IV Tank Using CLR and CCD Camera/Line Scanning Systems in an Outside Environment](#) (Belcamp, MD: SURVICE Engineering Company, 2008). ⁶⁹⁶ "Lost to the Germans in a battle at Sidi Rezag-Halfaya Pass in November 1941, re-marked by the Germans and used as a pill box at the same pass until recaptured by the British after the battle of El Alamein in October 1942. Sent to the US as part of reverse Lend-Lease scrap shipments in 1943 and diverted from Brooklyn, N.Y. to the museum in 1944," according to the Ordnance Museum Guide CD and *Tank Data*, 9. One of two Matildas in the United States.

⁶⁹⁷ Acquired from the [Fort Knox Patton Museum](#) in 1992, in exchange for the King Tiger. Painted RN is from Pilot No. 5.

⁶⁹⁸ Information from the Ordnance Museum Guide CD and *Tank Data*, 69.

⁶⁹⁹ Hull number from Pierre-Olivier Buan, [Surviving Panther Tanks](#), 19. Captured in the Ardennes according to Trevor Larkum, [Preserved Tanks Jagdpanther Tank Destroyer](#). See also Dmitry Kiyatkin, [PrimePortal: Jagdpanther Walk Around](#).

⁷⁰⁰ Number 331, hull number 305020. One of three surviving JagdTigers. The JagdTiger's front hull has damage from six hits by 75mm or 76mm rounds (none of which penetrated). However, one round severely damaged the mantlet while the gun was in full recoil, causing the gun to be jammed in that position. According to Geoff Walden, "[End of the War for s.Pz.Jg.Abt. 653](#)," [Third Reich in Ruins](#), this JagdTiger belonged to 3rd Company, PanzerJager Abteilung 653 and was lost in Neustadt an der Weinstrasse in March

⁷⁰¹ Information from the Ordnance Museum Guide CD and *Tank Data*, 41.

⁷⁰² Museum Director G.B. Jarrett mounted a 37mm gun on this PzKpfw III for display purposes. According to Thomas Jentz, Jarrett took a 7.5 cm KwK L/43 for display out of a rebuilt PzKpfw IV Ausf D (presumably the D/E/F model) that came out of Sicily and replaced it with the 7.5 cm KwK L/24 out of the PzKpfw III Ausf N. The tank originally came from Tunisia.

⁷⁰³ PzKpfw IV Ausf FG mit hydrostatischen Antrieb, only one built. "It was discovered em placed as a pill box near the factory," according to the Ordnance Museum Guide CD, as well as *Tank Data*, 55. See also [Achtung Panzer!](#) and Baumgardner, [Photobucket: FMCV193 PzKpfw IV Ausf FG](#).

⁷¹⁵ Has Iraqi RN 12254. Likely served with 8th Mechanized Brigade, 3rd "Saladin" Armored Division, according to *Museum Ordnance*, November 1993.

⁷¹⁶ Captured either on Luzon in the Philippines or on Okinawa, according to conflicting sources. According to Andrei M. Tomczyk, *Japanese Armor*, Volume 5 (Gdansk, Poland: AJ Press, 2006), p 4 (and supported by Trevor Larkum, [Preserved Tanks: Type I Ho-Ni I Tank Destroyer](#)), the Ho-Ni served with the "2nd Company, 2nd Self-Propelled Artillery Regiment, and was captured by the American 37th Infantry Division near Aritao (Luzon, Philippines) on April 6, 1945." However, Ordnance Museum records and the Ordnance Museum Guide CD claim it was captured on Okinawa from the 27th Tank Regiment. See also Neil Baumgardner, [Photobucket: FMCV46 Type 95 Ha-Go](#)

⁷¹⁷ Captured on Attu, Alaska and, in 1943, was the first Japanese tank to be brought to Aberdeen" according to the Ordnance Museum Guide CD and *Tank Data*, 127. One of eight Type 95s in the United States.

⁸⁷³ Access to the Detroit Arsenal is highly restricted. A number of other vehicles were formerly on display at the Detroit Arsenal, including an M48 Patton with a Shillelagh turret, an M55, a T43 heavy tank and the XM808 Twister. The M48 is now in Armada, Michigan and the XM808 Twister is now in storage at Fort Benning, Georgia, for the future National Armor and Cavalry Museum, while the others are now in storage at Anniston Army Depot according to ChrisC (AFV News Discussion Board, 7/2006). The T23 medium tank that was under restoration at the Detroit Arsenal for the Patton Museum has been returned to Fort Knox.

¹⁴⁵³ SN from Joe DeMarco and Bill Miley (2/2007). Marked 549th AAA Battalion, 87th Division.

¹⁴⁵⁴ SN from Joe DeMarco (2/2007).

¹⁴⁵⁵ Recovered from Fort Belvoir, along with the T28 super heavy tank now at Fort Knox, in 1975 and put on display at Fort Jackson c1977. For more information see "T-28 Exists," *AFV News* (Preston, ON: The AFV Association), Vol. 10, No. 6 (November 1975), 4-5 and "Home Found for Ft. Belvoir T-30," *AFV News*, Vol. 12, No. 6 (November 1977), 12. One of four surviving T30 heavy tank pilots.

¹⁴⁵⁶ First M4A1E13 Sherman flamethrower tank built, and the only E13-13 pilot constructed. Originally part of the Ordnance Museum collection at Aberdeen Proving Ground, Md. and then the nearby Chemical Corps Museum at Edgewood Arsenal. Moved to Fort Benjamin Harrison, Ind., in 1983; and finally to Fort Jackson in 1995, according to the tank's [plaque](#). The other surviving example, the E13R1-E13R2 pilot, is at Fort Knox, Kentucky.

¹⁴⁵⁷ These two tanks were originally located at Fort Benjamin Harrison, Indiana, from the early 1950s and moved to Fort Jackson in 1995, according to the M5A1 Stuart's [plaque](#) and the M46 Patton's [plaque](#). The Patton may be an M46A1 model.

¹⁴⁸³ SNs & RNs identified by the TACOM Central Registry (8/2007). Sherman is a former range target.

¹⁴⁸⁴ Named "Gabriel." "While in service in Israel, 17091 fought in the "Six Days War" (1967) and the "Yom Kippur War" (1973)," according to the [Cavanaugh Flight Museum website](#). "It shows some battle damage on the turret and on the main gun. The Israeli Army sold 17091 as surplus in the late 1980s. The Cavanaugh Flight Museum added 17091 to its collection in 2007." One of five M50 Super Shermans (four intact) in the United States.

¹⁴⁸⁵ Some information from Chris Neel (AFV News Discussion Board, 5/2006). SNs identified by Jeff Button (AFV News Discussion Board, 5/2008).

¹⁴⁸⁶ Formerly a range target at Fort Dix, NJ before being put on display at Fort Polk, Louisiana in the 1980s, and then at Fort Sam Houston ([where it was seen in 1990](#)), according to André Flener (G104, 1/2004).

¹⁴⁸⁷ Former French M4A4T / Israeli M50 Super Sherman, later fitted in the U.S. with a 105mm howitzer turret. Has SN 17884. Has painted RN 1238064. SN identified by Jeff Button (AFV News Discussion Board, 5/2008). M50 Super Sherman turret now on a former M4A3(105) range target wreck at the Russell Military Museum, Illinois, according to Jeff Button / Joe DeMarco (AFV News Discussion Board, 5/2008). One of five M50 Super Shermans (albeit not intact) in the United States.

¹⁵⁸⁹ The U.S. Army Ordnance Museum, including about 57% of its "macro artifacts," is scheduled to move to Fort Lee, Virginia in the 2011-2013 timeframe. "Construction on this facility is contingent upon the ANTICIPATED release of funding in FY11," according to the Fort Lee BRAC Office. "If funding is received as anticipated, target construction contract award date is Mar 11 with completion approximately 18-24 months later." The movement of many vehicles started in August 2009, with construction of the new Ordnance Museum scheduled to start in October 2010 and complete by the end of 2011, according to Luz Lazo, [Ordnance museum coming to Fort Lee, Richmond Times-Dispatch](#), 6 September 2009. ¹⁶⁰¹ "Used by US forces in Europe between 1944 and 1945. After the war, it was turned over to the Italian Army and used for several years," and then donated to the Ordnance Museum in 1967, according to the Ordnance Museum Guide CD. The Ordnance Museum Guide CD (and the draft 1990s *Official Ordnance Museum Guidebook*) claims that "the 3-inch gun on this, and other Italian M10s, were shortened by the Italian authorities and a counterweight collar was added to restore balance." However, only two other similar Italian examples (in Cassino and Monte Lungo) have been found (out of many others in Italy without shortened barrels), and it appears more likely that the shortened barrel and collar is the result of demilitarization.
